OBITUARY

Mrs. Bessie Caswell

The funeral of the late Bessie Caswell, beloved wife of Gordon Caswell, who died on Saturday, October 30, was conducted in Oyen United Church by Rev. C. R. Corcoran, on Monday afternoon, at 2 p.m.

The church, beautifully decorated with plants and flowers, was taxed to capacity when the service commenced, many of those present having to stand at the rear of the building and in the vestibule. Rev. C. R. Corcoran conducted an impressive service, giving comfort to those who mourned. A solo, "Rock of Ages" was beautifully rendered by Mr. Robert Nisbet, Mrs. G. E. Dickson playing the accompaniment.

At the conclusion of the service at the church, the cortege proceeded to Oyen cemetery, where interment was carried out.

The late Mrs. Caswell died in her thirty-seventh year. She was born in Guelph, Ont., and was married to Mr. Gordon Caswell in Calgary, August 6, 1916. Besides her husband and three children, Orion, age 3; Wilda, age 3, and Gladys, age 6, she is survived by her mother, Mrs. James Thompson, of Toronto, two married sisters, Mrs. Charles Adams and Mrs. Boyd, both of Toronto, and two brothers in San Francisco, Harry and Oton.

The following relatives were present at the funeral: Mrs. James Thompson, of Toronto (mother); Mr. and Mrs. W. H. Caswell; Mr. and Mrs. A. M. Caswell, and Mr. and Mrs. G. S. Caswell, all of Sibbald, Alta.; Mr. and Mrs. J. H. Bolwick, of Saskatoon, and Mrs. S. Caswell, of Biggar, Sask.

Beautiful floral offerings were received from: The family, Mr. and Mrs. W. Caswell, Mr. and Mrs. A. M. and G. S. Caswell, Mr. and Mrs. S. A. Miller, the United Church, Oyen, Kalshof of Oyen and friends, Mrs. Clifford Jones and Mrs. Boyd.

The following acted as pall bearers: Mr. T. M. Nunn, Mr. S. A. Miller, Mr. J. A. Whittle, Mr. E. D. Thygesen, Mr. Thor Lee and Mr. Elmer MacArthur. Mr. Thompson, mother of the late Mrs. Caswell, who arrived only a few hours after her daughter's death, left for Toronto today. Mrs. S. Caswell, of Biggar, Sask., will remain in Oyen for a few weeks with her son.

W. M. SANDERS SELLS HIS FARM TO JENS RASMUSSEN

Mr. W. M. Sanders, one of the pioneers of this district, has sold his farm near Landon to Mr. Jens Rasmussen of Penock, Maryland. Mr. Rasmussen arrived in the district on Sunday, and five papers completing the deal were signed and delivered in Oyen on Monday evening. The purchase price agreed upon covers the land, buildings, stock and equipment, and the deal is practically a cash one. The exact figure of the purchase price is not for publication, but it involves a considerable sum of money, and the transaction is worthy of note, coming as it does, at the end of a somewhat unsatisfactory season.

Everyone will wish Mr. Rasmussen success in his future ventures on his newly purchased farm.

Returned Men Express Thanks

Returned men of this district have asked the News to express their appreciation of the tokens proposed to them at the orchestral concert which followed the banquet given during the Teachers' Convention, recently held in Oyen. They also wish to congratulate the contestants on the able manner in which the tokens were presented.

WEDDING

Satre—McCullum

The marriage of Miss Mary Melinda McCullum, daughter of Mr. and Mrs. M. G. McCullum, of Oyen, and Mr. Martin Palmer Satre, of Seda, was quietly solemnized at the United Church Parsonage on the evening of Saturday, October 26, in the presence of a few intimate friends. Rev. C. R. Corcoran officiated.

COMING

'THE MERRY WIDOW'
OYEN THEATRE

LEGAL NOTICE

MORTGAGE SALE OF FARM PROPERTY

PURSUANT to the directions of the Registrar and by virtue of the Powers of Sale provided by the Land Titles Act, notice is hereby given that the mortgage which will be produced at the time of the sale, there will be offered for sale by Public Auction, at the Post Office, in the Village of Oyen, in the Province of Alberta, on Saturday, 27th day of November, 1926, at the hour of 2 o'clock in the afternoon, the following property, namely:

The Northeast Quarter of Section Eighteen (18), in Township Twenty-six (26), Range Four (4) west of the Fourth Meridian.

Terms of sale to be 10 per cent cash at time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the Vendor's Solicitor.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances, save taxes for the current year.

The Vendor is informed that the above property is situated about thirty miles from Stettin and Railway Station.

For further particulars, and conditions of sale apply to W. S. Woods, District Superintendent of the Soldier Settlement Board, Calgary, Alberta, DATED at Calgary, in the Province of Alberta, this 28th day of September, A.D. 1926.

S. R. VALLANCE,

Vendor's Solicitor.

Approved: W. Forbes, Registrar.

The Late William Regan Buried at Calgary

Large Attendance of Returned Men at Funeral

The funeral of the late William Regan was conducted at Spring Valley United Church on Friday afternoon, October 29, by Rev. C. R. Corcoran. A large gathering of friends were present to pay their last respects, including many returned men, who came to honor their departed comrade, held in high esteem by all.

After the service the body was taken to Corral and afterward to Calgary for burial, where mother, wife and brother, attended the last rites.

Straw Sheds for Swine

Early in November is the time to see that the swine have a comfortable and healthy shelter for the winter.

Observations at the Scott Experimental Farm of swine raised in an expensive building in portable cabins banked with straw and in straw shelters are the most satisfactory. These shelters are made by using a frame work of poles and woven wire, which are covered with about four feet of straw on the top. The walls are made by tramping straw between a double fence about four feet apart.

A pig spends much of the time during the winter in the bed and to maintain thrifty must be kept comfortable and dry. A lumber shed closed sufficiently to avoid drafts usually becomes rather damp and crippling of the swine usually results. The straw shed may be closed all but an entrance in the south. Ventilation through the straw is sufficient and the steam arising is absorbed in the straw. If a liberal supply of bedding is used in such a shed and replaced as necessary winter crippling is very seldom seen.

An All-Weather Recreation

NO rain checks issued for Billiards. You can enjoy a game night or day in any weather, any season of the year—and never tire of this greatest indoor game, especially when played on our modern Brunswick equipment.

RAPID TRANSIT IS PROPOSED BY AIR ROUTES

London.—From London to Canada in two and a half days, to India in five days, to Cape Town in six days, to Australia in 11 days and to New Zealand in 13 days. These were the possibilities of the air which Sir Samuel Hoare, British air minister, submitted to the Imperial Conference. "There is today no technical or operational reason," Sir Samuel declared, "why, by airplane, London should not be brought within a fortnight of the farthest cities and territories of the Empire." Sir Samuel devoted himself to civil aviation and proposed the organization of long distance Empire air routes beginning in the Far East and from Australia to Cape Town on the Atlantic plan. "We must," he said, "each of us insert our particular stone in the design."

His proposal, Sir Samuel said, involved no subsidy. It involved nothing more than cooperation between one government and another, and between military and service flying. Sir Samuel pressed that the Dominions and Dependencies should create and maintain landing grounds in good order. He held that the airship would carry out the long distance, non-stop air journeys of the future and indicated that the airships were not being built in England which should, with a normal load of freight and passengers, be able to fly without refueling in good weather a distance of 4,000 miles. There would be promenade decks outside the cabins, and ample smoking and dining rooms.

The airplane and airship were really complementary to each other, the minister said. It was necessary to organize flying along the lines of long distance flying, the airship being invaluable for short stage traffic and particularly needed at present when airplane programs were still in the experimental stage.

Two Thousand Buffalo Will Be Slaughtered

Necessary to Reduce Herd at Watnwright National Park

Ottawa.—Two thousand head of bison in Watnwright National Park are to be killed by orders of the department of the interior. In the past three years the buffalo population of the park has increased so rapidly that it has been found necessary to resort to killing some of the animals and shipping others to the Wood buffalo park where they are able to live off the grass.

In Watnwright park there is only room for about 8,000 head. In 1921 some 2,000 head of bison were killed. In 1922, about 2,000 were shipped to Wood buffalo park in Northern Alberta. This year the park authorities were confronted with the problem of how to dispose of 12,000 head of buffalo. During the summer 2,000 were sent north and 2,000 are to be killed. It is understood that the bison are being called for slaughterers' contracts.

"The slaughtering of 2,000 buffalo will mean that Canadians once more will have the chance to buy fresh buffalo steaks. The Government does not interfere with distribution and in 1921 it was a popular dish as far East as Montreal."

Greeks Object To Re-Opening Schools

Recent Order Which Makes Teaching of Italian Compulsory

London.—A Reuters despatch from Athens states that travelers arriving from Kalamata in the Ionian region report that the islanders there stone any desecrated cross or statue of Italian soldiers who landed from a destroyer in an effort to compel the Greek inhabitants to re-open their schools. The schools have been closed because of an order making the teaching of Italian compulsory. No casualties were reported, and the soldiers were driven. Confirmation of the report has not been obtained.

Five Day Week inaugurated St. Petersburg, Fla.—Inauguration of the five-day week working schedule effective November 1, has been announced yesterday by the St. Petersburg "Hunters" organization to follow the example of the Ford Motor Company, where the five-day week has been established.

All houses on the main arteries of Constantinople must be painted yellow.

Platinum has been found on the Gold Coast of Africa.

Will Unite East and West

Premier Gardiner of Saskatchewan Has Faith in Future of the H. B. Road

Saskatoon.—Discussing the effect of the completion of the Hudson Bay Road, at the banquet tendered by the board of trade here, Premier Gardiner said that the "Hudson Bay route" means the opening up of that great strip of productive territory between Dawson and the Hudson Bay. It means the cutting of the distance to Liverpool by a thousand miles during four or five months of the year and provides a fourth outlet for the growing production of Western Canada. Just as the opening up of the cropped area of the West added to the national prosperity, so will it increase through the building of the Hudson Bay line. To Canada it promises assistance in the solution of the problems of the Maritimes, which are the most discontented questions confronting Confederation today. The Maritimes, with their coal and timber, can develop a manufacturing industry based upon the existence of these two minerals in large quantities, which will give them hope to the people of that area, because the Hudson Bay route and storage at the bay will place them at the front door of the Western market, making it possible for them to compete with the central part of Canada and the United States on equal terms. In addition to carrying the broadest effects from the Rockies to the Hudson Bay, this road should unite East and West, and other advantages, including the fact that it will be a great undertaking has done, thus encouraging national aspirations in Canada.

The national characteristics of the Hudson Bay will cause the road to disappear in the interests of Empire when the first season of operation is over. The Hudson Bay has passed into history. In addition to carrying the broadest effects from the Rockies to the Hudson Bay, this road should unite East and West, and other advantages, including the fact that it will be a great undertaking has done, thus encouraging national aspirations in Canada.

No Signal From Mars

British Astronomers Fail to Catch Any Sign of Life From Neighboring Planet

London.—Mars, which just now is edging a little closer to the earth than ordinarily, failed to flash an SOS at the astronomers which might bring British astronomers or eager listeners at the radio, but thousands of enthusiastic stargazers and others remained hopelessly on the job.

The biggest telescope in Greenwich Observatory worked overtime to satisfy the eager desire for knowledge of Mars' hidden mysteries, but in vain. A 14-volt superheterodyne receiving set, installed by a wireless magazine, also functioned as best it could, but no inter-planetary sound, signs or symbols were trapped.

The Marthians, if there are such and if they have been engaged in an attempt to communicate with Mother Earth, will have to try again.

Gala Life Lease of White Lodge

London.—King George has presented a life lease of the Royal residence, White Lodge at Richmond, to Lord Lee of Farnham, who gave Chichester in 1923 as a country house for British premiers. White Lodge was built by George I. He last occupied was the Duke of York.

Gold Rush To Sweden

Skellefteå, Sweden.—A regular gold rush on the Alaskan side is taking place here, due to the reported new discoveries of valuable ore bodies in the province of Yesterbotten. The flat of minerals they contain includes copper, zinc, arsenic, silver and gold.

Auto Exports Increase

Ottawa, Ont.—Canada's automobile export business in the last twelve months passenger and freight auto have been sent to 16 countries throughout the world from Argentina to Iceland, from Iraq to Mexico. The value of these exports was \$10,766,945.

*Manitoba Shows Surplus

Winnipeg.—A surplus of \$600,000 for the fiscal year ending April 30, 1926, has been declared by the Bracken Government, the largest in the province since 1913.

SASK. CABINET IS REDUCED TO SEVEN MINISTERS

Saskatoon.—Rearrangements in the Saskatchewan Government as the result of the resignation of Hon. A. P. McNab as Minister of Education were announced here by Premier J. G. Gardiner. No new minister has been appointed and the portfolios have been reduced from eight to seven. Mr. Gardiner was one of the speakers later in the evening at a Hudson's Bay Railway banquet staged by the Saskatchewan Board of Trade.

Relinquishing the portfolio of minister of highways, Mr. Gardiner takes over the railway portfolio and also becomes provincial treasurer. Hon. W. J. Patterson drops the treasuryship and takes over highways and also retains his post as minister of telephones.

The portfolio of public works relinquished by Mr. McNab becomes the charge of Hon. J. C. Davis, the latter retaining his previous portfolio as minister of health. Mr. Uhrich, however, gives up his post as provincial secretary to Hon. T. C. Davis, the latter adding this to his other duties as minister of municipal affairs and minister in charge of the bureau of labor.

Hon. J. G. Gardiner, premier of Saskatchewan, was the chief guest of honor at the banquet. With him were associated Hon. John Bracken, premier of Manitoba, while Hon. W. R. Meigher, federal minister of agriculture; Hon. J. A. Crow, attorney general for Saskatchewan; Hon. A. P. McNab, minister of public works; Hon. T. C. Davis, minister of municipal affairs; C. R. McIntosh, M.P., Fred Johnson, M.P., Malcolm McPherson, M.P., and numerous provincial members sat at the chief guest table.

Civic chiefs, representatives of educational institutions, aldermen from nearby cities and towns were present to assist in celebrating the fact that the Bay road is now complete with the exception of the last 95 miles to Port Nelson.

The new route was also said to be publicly by Hon. A. McNab formerly with his retirement from the provincial government. High tribute was paid to "Archie" by numerous speakers. Premier Gardiner particularly praising Saskatchewan's oldest member of the Government.

Will Inspect Port At Prince Rupert

Party From Edmonton Is Looking Over Grain Handling Facilities

Edmonton.—The province of Alberta, the city of Edmonton, the Edmonton board of trade and the Edmonton area are represented in the party of four which went to Prince Rupert, in response to the recently given invitation of the board of trade and civil government of the coast city, that a representative delegation from Edmonton inspect the port of Prince Rupert, and the grain handling facilities of the port.

Saskatchewan Cabinet Changes

Removal of Unfair Advantages Given U.S. Publications is Requested

Ottawa.—Asserting that they only ask conditions justified for Canadian magazines in competition with the United States publications and periodicals, members of the Magazine Publishers Association of Canada went to Ottawa to present their case before the advisory board of tariff and taxation.

The association presented a number of resolutions passed by national bodies and gave details of various suggestions for relief but left decision as to the best form of such relief to the impartial judgment of the tariff board. Canada imports annually more than fifty million copies of United States magazines, many containing purely advertising matter which affects Canadian industry in general.

The association will ask removal of what it considers "favorable and unfair advantages at present conferred in Canada upon foreign publications."

When secured at a time when Canada was small and foreign circulation was not forced.

Proposal Does Not Please Mine Owners

Not Friendly Toward Abolition on Wages to End Coal Strike

London.—Labor is claiming that the present measure is being brought in to wear on the British government to intervene once more to get the coal strike settled, and some of the leaders are openly claiming that Montagu Norman, governor of the Bank of England, is prepared to finance the system of door-to-door relief schemes in Britain which there will be risk that Canada, like the United States will be swamped with a polyploid immigration from central and Eastern Europe.

Civic chiefs, representatives of educational institutions, aldermen from nearby cities and towns were present to assist in celebrating the fact that the Bay road is now complete with the exception of the last 95 miles to Port Nelson.

The new route was also said to be publicly by Hon. A. McNab formerly with his retirement from the provincial government. High tribute was paid to "Archie" by numerous speakers. Premier Gardiner particularly praising Saskatchewan's oldest member of the Government.

NOT NECESSARY TO DRY TROUGH AND DAMP GRAIN

Winnipeg.—The drought of tough and damp grain will not be solved at the present rate, says the editor of the trade of straight grain which he raised. These two questions formed the main topic of discussion at a meeting here for the board of grain commission-ers. Public and private elevator interests and the Canadian pools were represented by a number of the local grain traders took advantage of the slither to listen to the proceedings.

Following a lengthy discussion as to whether it was advisable to order the drying of tough grain at this time, it was ultimately decided to defer any action, but the board made it plain that should the necessity arise, it would take drastic action to save the crop from wasting. The chairman also expressed the opinion that tough wheat should be sold at a loss, rather than a speaker on behalf of the pool, and a shipper's representative both expressed the opinion that tough wheat was shipping out faster than the straight stuff, and that meantime the pool held no loss for deterioration.

With regard to the drought test, several interesting facts were related. Chief Inspector Fraser, in answer to a question, stated that the present test applied in the province of inspection, did not permit of grain containing more than 14.4 per cent of moisture, while the standard for the export of the Alberta wheat pool stated that it had been to his notice that at many places in his province, farmers market grain at country prices where there was no government inspector, were having their grain graded though it contained more than 15 per cent moisture. The pool had applied to the commission for the raising of the standard for the export of the province stated that following a conference with the chief inspector the board of commission had decided that they were satisfied that the present test was satisfactory to them.

Produce Films in B.C.

Canadian Moving Picture Concern to Establish Film Production Plant

Victoria, B.C.—Famous Players Lasky Corporation, of Hollywood, California, to establish a film production plant, it was announced today in connection with the incorporation, which officials of the company set through at the parliament buildings this morning, of the \$1,500,000 Famous Players Lasky Corporation Ltd., of Toronto and Vancouver as an extra provincial organization entitled to undertake business here.

The concern now is for financing out into an international organization and besides production in Canada, will extend its production in England, it was explained.

Fuel Famine Faces Europe

Paris.—A fuel famine, which is rapidly spreading to all the European countries is resulting from the British coal strike, according to reports from industrial centres. The shortage began to be felt in France last month when the iron and steel mills near the Atlantic coast were forced to tap their emergency stocks.

Another Air Record

Mitchell Field, N.Y.—An unofficial world's speed record for seaplanes was claimed for Lieut. Frank H. Conant, 2nd, U. S. N., when he drove over a four-mile course at a speed estimated by observers to be more than 250 miles an hour. Lieut. James R. Donnell, army aviator, holds the official record of 245 miles.

From Ocean to Ocean

Toronto.—Dr. P. E. Donnell, president of the Canadian Automobile Association has returned from a coast-to-coast tour of the Dominion. The wheels of the car in which he drove were stopped in the Atlantic at Halifax, and later in the Pacific Ocean at Vancouver.

Was Well Known in Canada

Ottawa.—B. M. Armstrong, 75 years old, former controller of the railway mail service, died at his home here, Oct. 27. Mr. Armstrong was largely responsible in the organization of the mail service as it is today. He resided about three years ago.

RED ROSE

"is good COFFEE"

Canada's Year Of Jubilee

The Dominion of Canada has entered upon its diamond jubilee year and on July first next year Canadians will celebrate in a fitting manner the sixtieth anniversary of Confederation.

It will be most timely and in every way appropriate if in the months intervening before that historic date all Canadian organizations make it the chief item in their programmes to study Canada, past, present and future, and to present facts to their members and the people generally relative to the history, the development, the resources, and the boundless possibilities of the country.

Canada's diamond jubilee year presents a glorious opportunity to all our organizations to make this a "Canada First" year. Would it not be a fine thing if, say once a month, every Canadian Club, History Club, Kiwanis Club, Lions, Gays, and other service organizations, every Homeowners and Community Club, the Canadian Legion, all fraternal bodies, I.O.O.F., Y.M.C.A., Y.W.C.A., United Farmers, churches and schools devoted a meeting to some one phase of Canadian life, history or development.

Indeed, why should the Departments of Education of the several Provinces not arrange a special programme of studies in regard to Canada, all designed to make our people better informed regarding the constitutional development of government in Canada, our position in the Empire, in the League of Nations, and better acquainted with the principles and procedure of government in Canada, the administration and enforcement of law, in a word, the growth and development of Canada from the status of a Crown Colony to a self-governing nation within the Empire and with full nationhood among the nations in the League of Nations?

This jubilee year presents a golden opportunity for the presentation of historical plays and pageants designed not merely to entertain and bring out the artistic qualities of our people, in their preparation and presentation, but also to instruct in a most effective way.

The twin provinces of Alberta and Saskatchewan are this year celebrating their coming of age as autonomous provinces, and advantage is being taken of this occasion to depict in various ways the growth and development which has marked the past two decades. In a special way these facts are being presented by floats in parades in connection with our summer exhibitions. But why should plans not now be made, not only in the West, but throughout the length and breadth of the Dominion, to present at every exhibition next year through means of floats, parades and pageants the Canada of 1827 as contrasted with the Canada of 1887?

Canadians, it is true, are not much given to this sort of thing. We are a reserved people and hate to display our feelings and emotions. We are not given to flag-waving. But surely all people in the Dominion should be proud of their coming of age as autonomous provinces, and advantage is being taken of this occasion to depict in various ways the growth and development which has marked the past two decades. In a special way these facts are being presented by floats in parades in connection with our summer exhibitions. But why should plans not now be made, not only in the West, but throughout the length and breadth of the Dominion, to present at every exhibition next year through means of floats, parades and pageants the Canada of 1827 as contrasted with the Canada of 1887?

Canadians, it is true, are not much given to this sort of thing. We are a reserved people and hate to display our feelings and emotions. We are not given to flag-waving. But surely all people in the Dominion should be proud of their coming of age as autonomous provinces, and advantage is being taken of this occasion to depict in various ways the growth and development which has marked the past two decades. In a special way these facts are being presented by floats in parades in connection with our summer exhibitions. Moscow Shirts Responsibility

Could Have Prevented Financial Help

Moscow obviously is in when it is to the Great Britain that it is unable to prohibit Russian "trades unions" from sending money abroad to aid trades unions in other countries and discontinue all responsibility for the financial help sent from Russia to British strikers while the general tie-up was on, and toward, upon refusal of the managers of the strikes to accept it, transferred to the miners' federation.

If, as the Soviet official asserts, there is no prohibition in its domain "against the remittance of money abroad, but only the obligation to obtain a permit for such remittance," that prohibition is lacking because the Moscow chiefs for their own reasons have purposely let down the bars, and they are putting them up again at any time, and in any particular instance, as it pleases.—Detroit Free Press.

2 Years' Backache

Subdued by "Nervine"

"Backache was the bane of my life, and for two years I was no longer able to be useful for work," writes E. S. Sloane, from Cleveland, Ohio. "I tried Dr. Williams' Pink Pills, but they did not help. I then tried Dr. Williams' Nervine, and in two years' backache was subdued, and today I am as well as ever."—35c at all dealers.

Manitoba Industries

The largest group of industries in Manitoba, in number of establishments, is wood and paper products, in which there are 213, according to figures compiled by the Industrial Development Board of Manitoba. Next in order come vegetable products, with 190 plants; chemical products, with 123; and textile products, with 49.

GIRLHOOD DANGERS

Come Through a Weakening of the Blood—A Tonic Is Needed. The danger to a girl's health is called common for girls to acquire their strength and mother's strength. Watch the health of their daughters at this time. It is when the strength is sapped by rapid growth that anemia develops. The first signs may be noticed in the face, pale lips, and headaches. The face grows thin, the hair falls out, and the body becomes apparent, with low spirits and depression.

Noticed anemia often leads to a decline, but if you see that your daughter's blood is enervated, there is no cause for anxiety. The finest blood-purifier ever discovered is Dr. Williams' Pink Pills. This will build up your girl's health and ensure for her healthy, happy life. Write to Mrs. George Johnston, Black's Harbor, N.B., says: "I think Dr. Williams' Pink Pills a wonderful medicine. My daughter, Margaret, was in a weak, nervous condition that we feared she was going into a decline. She had a very bad case of anemia, and she suffered from headaches, had no appetite and lost a lot of weight. Up to the time we began giving her Dr. Williams' Pink Pills, no treatment had helped her. But thanks to the use of this wonderful medicine she is as well and strong, showing no signs of the trouble that had so weakened her."

In all troubles due to weak, watery blood, Dr. Williams' Pink Pills will build a reliable remedy. Sold by all medicine dealers or sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Invited To Palace

Spanish Workman Did Not Recognize King Who Gave Him Life

Here is another story added to the many good ones told by King Alfonso of Spain. Driving recently past outside Madrid, the king's car came to a standstill, and a minor adjustment had to be made by the chauffeur. At that moment a tired-looking workman, who was walking in the same direction, came up, and, not recognizing the king, asked him for a lift as he made his way to the palace. The king, with a smile, told him to jump up, and the car conveyed him swiftly to his humble dwelling in the slums of Madrid. Then the king shook hands with the amazed workman, who had begun to thank him. "Good-bye old man," he said. "Have a good rest, and if you want any more at any time, come and see me at the palace."

More Bicycles Than Cars

Every sixth person in France has a bicycle, the total number being about 1,400,000. There are no more than a few bicycles in the country as automobiles.

Mind's Lament For Last Feet

The mind's last lament for the last feet of a man who has lived a life of service and sacrifice.

Wheat Pool A Huge Success

Chairman of Saskatchewan Pool Declares It To Be A Bigger Success Than Ever Dreamed Of

At a wheat pool meeting held at Melville, Sask., recently, and attended by over three hundred farmers, A. J. McPhail, chairman of the Saskatchewan Wheat Pool, stated that a determined effort would be made to increase the pool acreage by another million this season.

"The Pool," said Mr. McPhail, "is a far bigger success than any of us ever dreamed of; it will have a great influence to control prices, and it is a great unifying influence uniting the farmers of the three western provinces. It is the greatest business that agriculture has ever engaged in, and no man may see what it may grow to; it has given the farmer a standing which he never had before and its success has shown that the farmers can stick together." It was not and never has been the intention of the organization to control prices with the object of artificially raising the price. To do so, he said, would inevitably defeat its own object, for in that case wheat would be grown to a much larger extent and thus greatly increase the supply.

Japs Interested In C.N.R. Radio

Travel Over System To Secure Pictures On How Plan Works

For the purpose of investigating the progress of radio in Canada, particularly in "working" in the world of transportation as developed by the Canadian National Railways, Kikoku Suzuki, of Tokyo, Japan, and K. Togaaki, of San Francisco, are travelling over the system on radio-equipped trains. According to Mr. Suzuki, the Japanese Government railways are now experimenting in the establishing of radio on their trains, and they are anxious to secure an insight into the Canadian system which will enable them to operate over Canadian National lines.

Novel Racing Contest

Aeroplane Faster Than The Fastest Fugate

An aeroplane has proved 23 1/2 miles an hour faster than the fastest fugate in a race between two planes and 50 homing pigeons.

The novel contest was held between the fastest of the world, the Homing Pigeon and Auburn, nature's carrier taking the straight line course of 50 miles while the planes, one of which was forced down, were scheduled to fly 62 miles.

Despite the 12 miles handicap the Homing Pigeon finished three minutes ahead of the first plane, completing the longer distance in 48 minutes, or 5 1/2 miles an hour.

A compound has been invented which counteracts the effectiveness of poisonous gas.

If you find that you are being driven to despair, get out and walk.

Wireless Phones For Aeroplane Passengers

Experiments Between Pilots in Germany Prove Successful

Passengers on the huge air liners of the German Air Service, which on some planes furnishes movies and phonograph music for the diversion of air travellers, will soon be able to pick up a wireless telephone receiver and, despite the roar of three 120-horse-power motors, talk with any telephone subscriber in any large city of Germany.

Wireless telephone experiments between pilots on two of the night air routes and landing fields have proved successful. The pilot circling over Stockholm in a thunderstorm talked with Tempelehofer, field in Berlin for five minutes.

The Air Service directorate announces that wireless telephones will be placed at passengers' disposal first on the routes between Berlin-Paris, Berlin-Hamburg-Berlin and Berlin-Konigsberg.

The phones operate in the same manner as the wireless telephone apparatus on trains between Berlin and Hamburg.

Girl Receives Bronze Medal

Honoree of Lighthouse Rewarded By Committee of Loyds

The committee of Loyds has awarded the Lloyds bronze medal for merit to a young girl, Miss Helen, for her services to the Lighthouse. The medal is given to the person who, in recognition of her endurance in keeping the lighthouse lamp working for three days during a gale last March. The girl was the Lighthouse keeper's daughter, and her parents made a dash for shore to retrieve the medal, which she had given to the Lighthouse. For three days and nights the girl was alone with only her pet dog for company. Undoubtedly the Lloyds medal has not been previously awarded to a woman.

Twenty feet up a steel ladder at regular intervals to attend to the oil burning lamp. All the food she had was two pounds of bread, and when her parents returned she was quite well and cheerful.

The Lloyds bronze medal has not been previously awarded to a woman, but the silver medal was conferred upon the wife of a ship's captain in 1917.

Use Bad Language

Modern Mother Responsible For Great Deal of Loose Speech

Bad language of the modern mother is responsible for a great deal of loose speech among school girls. Miss Mary Morrison, principal of the Francis Holland School for Girls, told at a conference of the headmistresses' association in London.

For years we have made allowances for the use of strong language. Miss Morrison asserted, "but now mother is nearly as bad, and it is having a serious effect on the girl's speech among themselves. This is all a part of the so-called 'free speech'."

Drives Asthma Like Magic

The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. It is a natural remedy used in a natural way. The remedy is a natural vapor, reaching the most remote passage of the affected bronchi, and opens a way for fresh air to enter. It is sold by dealers throughout the land.

Population and War

Militarists in all countries demand an increasing population, in order that an unending supply of recruits may ensure the national safety in the next war; but then they also hold that wars are inevitable owing to the pressure of expanding populations.—London Spectator.

The cheapness of Mother Graves' Asthma Remedy will give it a wide reach of all, and it can be got at any drugist's.

An Unexpected Sequel

Man Failing to Carry Out Death Pact

A death pact drama at Southport had an unexpected sequel. The young man, aged 18 and his sweetheart, of the same age agreed to commit suicide together. The girl died. The man failed to make good his share of the pact and as a result the court has condemned him to death for murder. The law holds that if two persons agree to commit suicide, and in consequence one of them dies, the survivor is guilty of murder.

Organ Hundred Years Old

A bamboo organ, built into the church of Las Pinas, Manila, more than 110 years ago by the Augustinians, still gives sweet and mellow tones. The bamboo was cut from a jungle near the church. The organ was well damaged, by earthquake and typhoon.

Powerful Medicine. — The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Eucalypti Extract. It is the most beneficial of all remedies offered to the use of man. Many can testify to its power in alleviating pain, and many more can testify that they have been cured of their ailments. Its power is not expressed by the small price at which it sells.

He had just arrived from the old country and was not familiar with the use of the telephone, so he took down the receiver and demanded: "Ayo want to talk to my wife."

The operator's voice came back sweetly: "Yes, please."

"Oh," he replied, "she bane my second son."

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites cannot flourish after they come in contact with the medicine. The worms are speedily expelled with other refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

In a certain town in Italy the taxes are levied according to the weight of the taxpayer. The fat man is assumed to be prosperous and charged on his proportion.

Advice is not always cheap

WHEN it concerns investments, advice may often prove very expensive.

If farmers went to a bank for investment advice instead of some inexperienced friend—if they knew how willing banks are to help people invest safely and profitably—millions of dollars would be saved each year.

In considering your next investment see the branch manager of the Bank of Toronto.

A Bank of Toronto manager is always glad to give advice—based not on guesswork or hearsay, but on investigation and facts.

Lord Willingdon Honored by McGill

Lord Willingdon, Canada's new Governor-General, was honored by McGill University in Montreal recently, when the honorary degree of L.L.D. was conferred upon His Excellency at the McGill University Convocation. His Lordship paid his first official visit to Montreal when he arrived for the ceremony on October 6th. He was met at the Windsor Street Station by E. W. Beatty, President of the Canadian Pacific Railway and Chancellor of McGill University, and Sir Arthur Currie, Vice-Chancellor of the University.

Grounds lined the short route of the procession along the University campus and the three bordering University grounds. The vivid colors of the fall academic gowns were seen. His Lordship, tall and impressive in scarlet and white robes and black velvet cap of the L.L.D. The honorary degree was conferred by the Chancellor, Lord Willingdon's grace services to India and to the Empire were cited by Sir Arthur Currie which he rose to present His Excellency for the degree of Doctor of Laws. When the degree was bestowed the entire assemblage stood while His Lordship signed the book of honor. In a brief speech he said: "I rise for one moment only as a visitor to the representative of our beloved sovereign King George, to express to you, as Chancellor of this university, my sincere appreciation of the high honor that you have done me today in giving me the honorary degree of L.L.D."

The University was, continued the Governor-General, taking him much on trust, as they knew very little about him beyond hearsay. "I can only say here and now that I sincerely hope that the future years may show that I am worthy of the trust you have given me this afternoon."

The photograph shows from left to right, Lord Willingdon, E. W. Beatty, Chancellor of the University, Monaghan A. V. J. Beatty, Rector of the University of Montreal, and Sir Arthur Currie, Vice-Chancellor in full academic gowns.
